

FIG. 1

A high-contrast, black and white photograph showing a close-up of a textured surface, possibly a piece of fabric or paper. The image is characterized by a dense, grainy texture. A bright, irregularly shaped light area is visible in the center, contrasting sharply with the surrounding dark, textured background. The overall appearance is abstract and somewhat ethereal.

Fig. 2

A high-contrast, black and white photograph showing a dark, textured surface, possibly a wall or ceiling, with a bright, curved, and highly reflective area on the left side. The image is heavily grainy and noisy, suggesting a low-quality scan or a very dark, reflective surface.

FIG. 3

0997600 112004

FIG. 4

This is a high-contrast, black and white image. The majority of the frame is filled with a dark, heavily textured area that appears grainy and noisy, resembling a close-up of a rough surface or a heavily shadowed object. On the right side, there is a bright, irregular, and somewhat jagged shape that stands out against the dark background, possibly representing a highlight or a specific feature of the object being imaged. The overall quality is poor, with significant noise and a lack of fine detail.
